

[SmokeMaster® C-12 Air Cleaner](#)

The **SMOKEMASTER®** line of **commercial air cleaners** are self-contained [electronic air cleaners](#). Ideal for restaurants, bars, bingo halls or any other facilities where cigarette smoke is a concern try our commercial air purifiers. Smokemaster models feature our unique four-way [Coanda](#) airflow method of air recirculation. With the [Coanda air pattern](#), dirty air is drawn into the Smokemaster from the bottom, and clean air is recirculated in four directions, for **thorough and immediate air cleaning** results. Our durable aluminum cell design eliminates the need for filter replacements while providing years of high efficiency service.

## EverClear Commercial Air Cleaner

[EverClear from our line of HEPA Air Cleaners](#)

The **EverClear®** line of **cigarette smoke removal systems** are self-contained HEPA-type [air cleaners](#). These comprehensive, **state of the art filtration systems remove dust, smoke, pollen and other particles** using high efficiency disposable filters. Activated carbon modules with up to 44 lbs. of activated carbon are available with this air cleaner for odor and vapor contaminant removal. **EverClear®** models also feature our unique four-way [Coanda effect](#) airflow method of air recirculation. Units controlled by your choice of a unit mounted or wall mounted infinitely variable speed controller.
